

EST 3000™

ENGAGEMENT SKILLS TRAINER 3000™

Cubic's EST 3000™ is a high fidelity weapons training system using the latest graphics technology and Cubic's U.S. Army validated ballistics software.

KEY BENEFITS

- Easy set-up and break-down
- Three modes of training
 - Marksmanship
 - Collective
 - Shoot - Don't Shoot
- Compatible with all Cubic high fidelity weapons
- Fits in any 10 foot (3m) by 16 foot (5m) room
- Large library of training scenarios included

EST 3000™ in use

- New scenarios are easy to create in Collective or Marksmanship modes on included scenario editor
- After Action Review (AAR) feature for instant feedback on all modes
- Designed to facilitate self training or instructor led training
- Includes U.S. Army marksmanship qualification courses of fire for included weapons
- Weapon loading and malfunction clearing procedures are modeled correctly in all weapons
- Laptop based instructor/operator station complete with operating system, and EST software
- Supports Cubic's VTS graphic engine
- Additional weapons may be purchased off of GSA schedule GS-02F-0024T

EST 3000™ shown monitoring real-time data of all the trainees
