

ALL-NEW RELEASE

UNIFIED VIDEO+

FMV MANAGEMENT
SMARTER, FASTER, & BUILT TO SCALE WITH YOUR MISSION.

UNIFIED VIDEO+ revolutionizes intelligence gathering by enabling **METADATA** rich **REAL-TIME** and **ARCHIVAL** video processing, storage, and dissemination, transforming global **FMV FEEDS** into **ACTIONABLE** intelligence and empowering users with **COMPREHENSIVE** tools for rapid **ANALYSIS** and **DECISION-MAKING**.

WHAT'S NEW IN 3.21.2

- 
TIMEWARP DVR FUNCTIONALITY
 Instantly rewind, replay, and analyze video with full DVR controls. High-performance streaming and archive support empower faster incident review and better decision-making.
- 
ENTERPRISE FEED MANAGEMENT
 Control video access with precision. Restrict access by nationality, organization, or role, ensuring secure, mission-specific distribution of FMV feeds.
- 
IPv6 COMPLIANCE
 Enable secure, scalable connectivity across modern networks. Unified Video+ seamlessly bridges IPv4 and IPv6 environments, ensuring future-ready FMV distribution.
- 
KUBERNETES ARCHITECTURE
 Drive maximum resilience and scalability. Containerized infrastructure ensures smooth updates, continuous operations, and flexible cloud scaling.

WHY IT MATTERS

- 
FOR ANALYSTS:
 Faster search, smarter filtering, instant incident replay.
- 
FOR OPERATIONS:
 Mission-focused video access control, anywhere, anytime.
- 
FOR THE PLATFORM:
 Cloud-ready scalability, network flexibility, resilient infrastructure for global missions.

Unified Video+ delivers next-gen video intelligence and the enterprise FMV advantage, integrating real-time and archived video into a unified platform that accelerates decision-making when and where it matters most.
